for oil, dry and wet grip

Nitrile double coating

Liquid resistant fingers

FEATURES

- » In addition to the double coated palm, fully coated fingers provide more safety and protection from soil, dirt and oil penetration, ideal when working in narrow, hard to access spaces where fingers are more exposed to risks.
- » Using our patented Overdip technology, the double coated surface offers enhanced durability and great protection against oil penetration, keeping the users hands clean.
- » The 13 gauge open-back nylon liner offers excellent flexibility and reduced perspiration, minimizing hand fatigue, thus increasing productivity.
